

CPS members and students are cordially invited to a presentation entitled

Electronic properties of molecular thin films and interfaces investigated by photoemission

Presented by: Ing. Ján Ivančo, DrSc.

4th December 2019

2:00 pm room 136/U17

Topics:

- Organic electronics;
- Electroactive films constituted by small molecules;
- Film growth, properties and associated interfaces examined by photoemission;
- Ionization energy, workfunction.

doc. Ing. et Ing. Ivo Kuřitka, Ph.D. et Ph.D.
Project Coordinator
