

CPS members and students are cordially invited to a presentation entitled

Memristor: A variable resistor with memory

Presented by: prof. Stephen H. Foulger

June 21 th 10:00 AM

room 136/U17

Topics:

- 1.Organic and Polymeric Memristors
- 2.Utilize structure-property relationships in monomer design to create tailorable conductance polymers
- 3.Memory device photoluminescence and Thermally stimulated current
- 4.Memristors for neuromorphic applications

doc. Ing. et Ing. Ivo Kuřitka, Ph.D. et Ph.D.
