

## Annotations of Doctoral Thesis Topics for Degree Course in “Nanotechnology and Advanced Materials”

<b>Topic:</b>	<b>Preparation and characterization of functional nanostructured fillers for advanced polymer systems</b>
<b>Tutor:</b>	<b>prof. Ing. et Ing. Ivo Kuřitka, Ph.D. et Ph.D.</b>
<b>Consultant:</b>	-
<b>E-mail:</b>	kuritka@utb.cz

### **Annotation:**

The work will be focused namely on preparation and characterization of nanostructured microparticles with special attention paid to mechanisms playing role in the synthesis process. Next, the polymer matrix component will be studied either from the processing point of view or chemical modification of the polymer of natural or synthetic origin. With respect to application, possibilities and processes of nano and micro-materials incorporation into the polymer matrix will be investigated to address recent issues in this field.

### **Requirements:**

Knowledge of general, macromolecular chemistry and physics at the university level. Good knowledge of the English language or a potential to the improvement. Basic manual and laboratory work skills. Ability to work independently.
